Professional Summary

Proactive and skilled MERN Stack Developer with hands-on experience building responsive, scalable web applications. Proficient in the full development lifecycle, from UI design to backend logic. Passionate about delivering impactful digital solutions, with a special interest in energy, sustainability, and smart systems, and seeking a full-time Full Stack Developer opportunity in Dubai with visa sponsorship.

Technical Skills

- **Frontend**: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap
- **Backend**: Node.js, Express.js
- **Database**: MongoDB, Firebase, SQL (Basic)
- **Tools & Platforms**: Git, GitHub, Postman, VS Code
- **Concepts**: REST APIs, Authentication, Routing, Responsive Design
- **Currently Learning**: PostgreSQL, Docker, AWS (Basic)

Projects

◈ NxtTrendz – E-commerce Web App (Frontend Focus)

Tech Stack: React.js, Mock API, CSS

🔗 GitHub: github.com/jeyadhivan/nxt-trendz-paymentEnhancement

- Designed and developed the frontend using React.js and CSS.
- Used mock data to simulate backend functionality.
- Implemented secure login, JWT authentication, and protected routes.
- Built dynamic product pages, filtering, and responsive layouts.
- Enhanced the existing e-commerce UI by adding a checkout page and payment success/failure routes.
- Built additional components like cart item summaries, total calculations, and styled modals.
- Focused on user experience improvements during the purchase flow.

◈ Jobby – Job Portal App (Frontend Focus)

Tech Stack: React.js, Authentication, CSS Modules

🔗 GitHub: github.com/jeyadhivan/jobby

- Designed frontend UI and built job listing, search, and profile features using mock data.
- Integrated Authentication for login functionality.
- Implemented protected routes and dynamic job detail pages.

◈ Daily Mood Tracker App

Tech Stack: React.js, CSS, Firebase

🔗 GitHub: github.com/jeyadhivan/DailyMoodTracker

- Developed a wellness-focused mood tracking app that allows users to select their daily mood and log it with time stamps.
- Used Firebase for real-time storage and mood data retrieval.
- Built dynamic visual feedback, including mood-based colours and conditional rendering.
- Includes animations, calendar view, and mood trends analysis.

◈ Portfolio Web App

Tech Stack: React.js, JavaScript, CSS, Vite, Firebase, EmailJs

🔗 GitHub: github.com/jeyadhivan/Portfolio | Live: portfolio-55hy.vercel.app

- Built and deployed a responsive portfolio featuring projects, resume, and contact form
- Integrated **Firebase Realtime DB** for storing and displaying comments with live updates
- Used **EmailJS** to send instant email alerts from the contact form without a backend
- Implemented **input validation, auto-clear alerts, and toast notifications** for a smooth UX
- Designed with reusable React components, animated transitions, and mobile responsiveness

🎓 Education

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

Anna University – BIT Campus, Tamil Nadu, India | *2013 – 2017*

Career Objective

Seeking a Full Stack Developer role in Dubai where I can contribute to impactful digital products, advance sustainability-focused innovation, and collaborate with dynamic teams while continuing my technical growth.

Relocation & Availability

- Open to relocate to Dubai
- Available immediately
- Require visa sponsorship
